iSYSTOC INFORMATION

By Dave Kremer, CEO

As an employer do you want access to your employees' information electronically? FirstMed has the ability to allow you electronic access to your employee's information concerning injury management, drug screen results, return to work status and much more. We utilize SYSTOC software for all the data management of the information we gather concerning the testing and medical treatment of your employees. The SYSTOC software has developed a password protected portal for employers called iSYSTOC to allow you this information concerning your employees.

iSYSTOC will allow you instant access to the injury and testing information you need concerning your employees and only your employees. This feature can help save you time by eliminating phone calls about someone's work restrictions or next appointment. Once you have been approved by FirstMed you have 24/7 internet view-only access to applicable SYSTOC data, such as patient-specific injury, treatment, and drug-screen information. The data is presented in an interactive, online environment over a secure and encrypted connection.

If you are interested in learning more please contact Johanna Hall at 801-746-0770 ext 104 and she will be happy to answer your questions and/or get you signed up and using iSYSTOC.

Video Task Assessments

In addition to the advantages offered to you as an employer through iSYSTOC we now offer the opportunity for you to have job tasks and required weights and forces videoed for you. This information can then be included with your profile in SYSTOC. This gives our medical providers the ability to actually see the requirements of a work assignment which helps them determine work capabilities as they formulate their treatment plan.

FLU VOUCHERS

This is just a friendly reminder as we are rapidly approaching the flu season. We are prepared to administer the seasonal flu vaccine as recommended by the CDC. Please note, this vaccine does not provide protection from the H1N1 flu but is intended to prevent the seasonal flu.

We have secured a limited supply of the vaccine for our employers and are making it available on a first come first serve basis. To more efficiently meet your needs, we will be providing vouchers which you may give to your employees directing them to FirstMed. These vouchers will be customized to include the name of your organization. The names of individuals receiving the vaccine should be entered in the space provided. The vouchers are redeemable at any of our five locations. *

To ensure you only pay for vouchers used, the vouchers will be collected at the end of each month and a report will be mailed to you indicating the names of individuals who redeemed the vouchers. You will be billed at that time for those employees who redeemed vouchers in the preceding month. Each flu shot is \$25.

If you would be interested in participating in this flu vaccine program or have further questions, please contact Johanna Hall at 801-746-0770 extension 104.

****FirstMed will make every effort to ensure flu vaccines are available to your employees; however, there is no guarantee the supply will meet the demand for the vaccine. To better ensure availability we recommend your employees receive their flu shots by December 1st.***
